## DISCLAIMER

Publication and distribution of the ideas, theories, concepts, descriptions, processes or instructions published in this book in no way represents or constitutes a claim that any product, system, or device manufactured or offered by Kelly Research Technologies, Inc., nor any other scalar, radionic, psychotronic, or free energy device, can have a positive, negative or any other impact on human health, or is in any way a replacement for or supplement to the advice or treatment provided by state and federally licensed medical and other commonly recognized allied health care professionals.

Kelly Research Technologies' radionic instruments and accessories are intended for agricultural research only and can in no way treat any medical condition or prevent any human medical condition from occurring. All radionic rates, frequencies, and other patterns of information are compiled for historical, energetic, and/or experimental agricultural research only and are not intended for use with humans at any times.

More specifically, Federal law states that only a medical doctor and/or prescription drug is/are able to diagnose, treat, prevent, or cure disease. All information and all correspondence verbally, via email, brochure, letter or otherwise does in no way make any claims to diagnose, treat, prevent or cure any ailment, affliction, suffering, or disease that any person(s) have had, currently have, or will have in the future. It is always recommended to discuss with your medical doctor prior to making any changes in diet, nutrition, supplementation and exercise.

## Statement of Mission

**To distribute top quality technology, resources, and information to the global community of radionic researchers.**

## About Us

Located in Lakemont, Georgia, Kelly Research Technologies was incorporated in 2006 in order to sustain and advance the radionic technology developed by Peter J. Kelly from the early 1970's until his untimely passage in 2004. Core among his contributions was the design of a two-bank radionic instrument that integrated the Hieronymus design for variable plate capacitance signal tuning with the knowledge of solid state amplification he'd acquired while in service to the nation in the U.S. Navy. As a founding member of the U.S. Psychotronics Association in 1974, there were many opportunities for friends and colleagues to try the new instrument. The "Kelly Instrument" would be built for friends, then friends of friends, then in 1978 the first one was sold to a complete stranger – the first of thousands that would choose this sensitive, reliable, and easy-to-operate radionic device.

Today, Kelly Research Technologies manufactures and distributes not only the famous Kelly Personal Instrument, but also a complete line of radionic instruments designed to meet the needs of both the advanced researcher and the busy farmer. In all Kelly instruments, the combination of variable capacitance tuning and solid state amplification allows determination of scalar frequencies and assessment of their intensities through the focused intent of the trained operator, as well as transmission of in-phase and reverse phase scalar frequencies. With thousands of two-dial radionic rates available, Kelly radionic instruments are ideal for all aspects of radionic agriculture, as well as many types of amplified dowsing.

Our 30-day, no-hassle, money-back guarantee ensures that every customer has a pleasant, professional experience. Whatever your reasons, simply return the item to us in like-new condition and receive a full refund of the purchase price. Your only risk is the price of postage. Find out why we've had a great reputation in the radionics community since 1978!

# Foreword

In the 100 years since radionics was first discovered by Dr. Albert Abrams there have been thousands and thousands of rates developed. Many of these patterns of information were indentified by the well-known inventors of the radionic instruments: Abrams, De La Warr, Hieronymus, and my father – Peter J. Kelly – among many others. But a significant number of the rates in the KRT database were developed and discovered by everyday folks – radionic researchers who used their instruments to locate the strongest resonance points on the tuning dials for a particular sample or reagent.

Kelly Research Technologies has been compiling and developing radionic rates for 40 years. A crowning achievement was translation of the rate book for the multi-dial De La Warr instrument to the two-dial system popularized by Hieronymus, which required setting, measuring, and recording nearly 1,500 rates on both types of instruments. In 1983 Peter published *Psychotronics Book 2*, a collection of historical and new rates. This book was only available for a few years before it was banned by U. S. Food and Drug Administration as a result of my dad's naive use of terms like "diagnose", "treat", and "cure" throughout. In 1998 the information was re-released as the Electronic Rate Book: a computer database with the offending terminology removed and the ability to search and sort the rates as never before. In 2011 the E-Rate Book was totally overhauled, the ever-growing database totaling more than 13,800 rates, the ability to create worksheets and reports on the fly, as well as access and print from a library of 28 pre-formatted worksheets organized on a variety of themes and processes. One unexpected benefit that came from our overhaul of the E-Rate Book software was that the process of organizing the information into book format was suddenly a realistic goal for our tiny staff of three people.

It is thus with tremendous pride that here on the 30<sup>th</sup> anniversary of publication of *Psychotronics Book 2* I introduce these two new volumes of radionic rates! *Radionics Book 3* presents the rates sorted alphabetically by the name of the patterns of information. *Radionics Book 4* delivers the rates sorted numerically by left hand dial and then right hand dial. Both books include every single radionic rate published in the KRT Electronic Rate Book software.

In addition to publishing these books on paper, we have also decided to publish both volumes in an electronic format that will facilitate giving them for free to anyone who wants to download a copy. Moreover, we are publishing these books under a creative commons license; **you are free to copy, distribute, and transmit this work**, including reposting of the PDF files on your blog or website. We only ask that the books remain attributed to us at Kelly Research Technologies, that the work never be sold without our participation, and that it will not be altered, transformed, or built upon without our participation.

PS: Do you have new radionics rates that you want to share? Send them to us for compilation in future volumes!

## Dedication

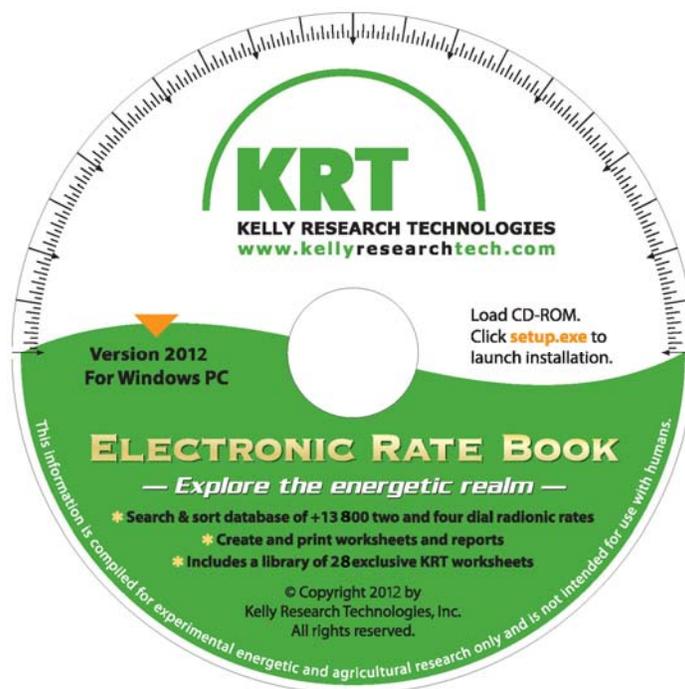

Creation of these volumes would not have been possible without the assistance of **Chelsey Jordan**, who proofread more than 500 pages of entries and eliminated innumerable typos and errors. Also of inestimable significance has been the contribution of **Bill Schmidt**, whose expert management of the database has automated production and formatting of ALL of these rates. Thanks Bill – this book exists because of you.

But none of this would have been possible without the 30 years of dedication and devotion provided by a single person within our organization. One lady has been responsible for compiling these rates since her first day at KRT. She has managed migration of the database across numerous computers and software programs, learning new hardware and new ways to organize the information in the process. And she has coordinated with all of the contributors – instructors, dealers, organizations, and individuals – at the same time as she answered a continuous stream of requests for information from our peers, clients, and members of the community.

For this tremendous contribution *Radionics Book 3: Radionic Rates - Alpha* is dedicated to **Cathie Jordan!**

# KRT Electronic Rate Book: *Version 2012*

Forged through collaboration with one of the nation’s smartest database developers, the reinvented E-Rate Book offers all the features provided by the original and many more:

- More than 13,800 radionic rates for two, four, and 360° dial instruments
- Enhanced supporting information to drive successful use of radionic rates
- Advanced search and sorting capabilities provide easy access to information
- Ability to produce customized worksheets and reports
- An integrated library of 28 of the most commonly used radionic worksheets
- Advanced “help” functions provide step-by-step instructions for every use
- Easy-to-use interface with no hidden menus or programming codes required!

---

Version 2012 of the KRT Electronic Rate Book is the ultimate rate resource for operators of all radionic instruments that utilize the two dial rate format, utilized by Hieronymus, Kelly, Mattioda, Lightning, Rogers, and the SE-5.

# How to Use this Book

**Header:** The top right corner of each page features the first three letters of the first Pattern of Information listed on that page, allowing the user to quickly flip to an entry. After the introductory pages, the page number is found centered at the top of each page.

**Patterns of Information:** Every radionic rate in this book was originally identified when a trained operator used a two-dial radionics tuner to locate a pattern of energetic resonance and/or interference from a sample, witness, or their own focused intent. This unique resonant or dissonant relationship with the original sample provides the basis for the researcher's efforts to alter the energetic balance in the crop, soil, or barn. An alphabetic listing of this information allows the users to quickly locate rates that other users have identified as having resonance in similar situations and may provide clues in the search for the cause behind the cause in a given situation.

However, it is also important to remember that the names given to these rates by their discoverers may or may not apply to the specific situation being considered by the current researcher. Whether or not a particular pattern of information is actually applicable to that situation must be tested by that operator at that time. Always test for desirability, suitability, and permission before broadcasting.

**Rates:** All rates are presented in pairs with two digits of decimal accuracy for each rate. Remember that fractional amounts to the right of the decimal point are the fractions of the space between tick marks on the rate dial. The shortest tick mark shown on the KRT rate dial is 0.50 (see Figure 5). The examples in Figure 3 will be used to illustrate how radionics rates are presented in this book:

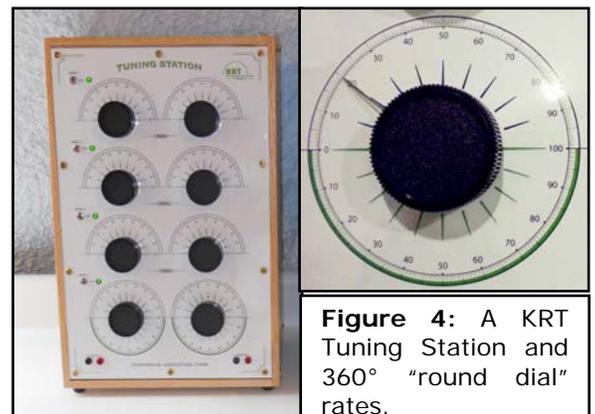

Immune System, Molecule, Cytokines, May be causative factor in Wasting Types Diseases	34.00	54.25
Implant Mechanism, ( 1) Negative Entity	36.50	36.50
	21.00	05.50
Mold, Rinkel Mold Mix A	-97.50	23.25
Moles & Warts	26.00	32.50

**Figure 3:** Examples of rates from this book.

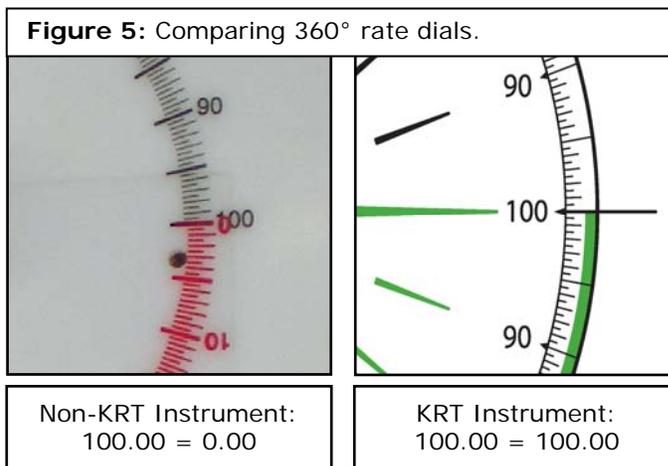

**Single Bank Rates** - The majority of rates in the KRT database require only a single rate bank to use. *Moles & Warts* is a typical single-bank rate and would be set on the instrument by turning the left dial until the needle was set to 26.00, setting the right hand dial to 32.50, then activate that bank by turning on the switch. Note that both the left and right hand dials must be set in order to achieve the desired information or impact. The rate for *Immune System, Molecule, Cytokines* would be utilized in the same manner.

**Multiple Bank Rates** – Multiple bank rates provide additional frequency information about a pattern of energy, thus improving resolution in analysis and resonance when broadcasting. In this book multiple bank rates are shown as additional rows of instrument settings printed within the same block. *Implant Mechanism* is an example of a two bank rate. To use, set 36.50-36.50 on Bank 1, 21.00-05.50 on Bank 2, and turn on both bank switches.

**Round Dial Rates** – Some radionic instruments are equipped with 360° rate dials that allow the researcher to explore the other half of the waveform when identifying a pattern of energetic resonance in a sample (see Figure 4). With *Mold, Rinkel Mold* the operator will set -97.50 in the “green field” area of the dial on a Kelly instrument, such as a Seeker, Workstation, or Tuning Station. Note that the minus sign only applies to the one rate. The right hand dial setting of 23.25 will be set in the black-only upper part of the dial.

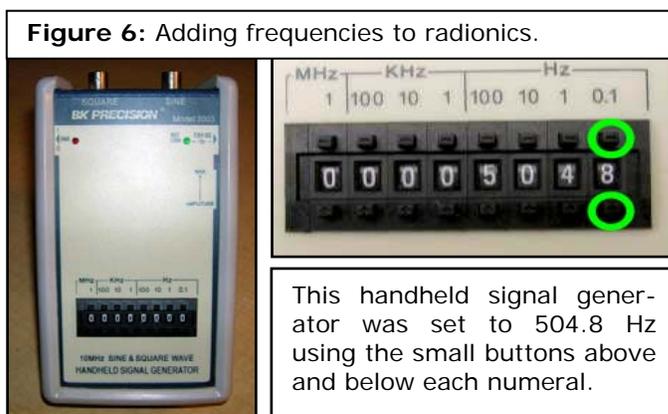

**Note to users of non-Kelly instruments** equipped with 360° rate dials. Be sure to check the numerical arrangement on the lower part of your 360 degree rate dials before using a rate from this book. On some instruments the number "100" is followed immediately by the number "-1" rather than "-99" as shown on Kelly instruments. Because all round dial rates in the Kelly database are configured for our own instruments, users of instruments configured the other way must be sure to convert the rate for use with their instrument by subtracting the number from -100.00. For example, for *Mold, Rinkel Mold*:  $-100.00 - (-97.50) = -2.50$ , the rate set on the "100=0" style instruments made by other vendors. See page 505 for more information on the 100=100 rate dial.

### Energetic Processes

This field of the database often provides supplementary information intended to help the radionic researcher use the listed Pattern of Information successfully. More specific information may include:

- **Analysis-only Rates:** Some rates are intended to be used in analysis mode only. If so, this will be noted in the "Energetic Processes" field and, usually, the correct rate for balancing will be provided.
- **B/R:** Simply means "balance on rate" - use the listed rate for the broadcast.
- **Complementary Rates:** This field will often include rates that can be tested at the same time or in series with the primary rate listed. Always test for applicability.
- **Frequencies:** Abbreviated as "Freq", the frequencies listed in the Energetic Processes field are non-radionic waveforms listed in cycles per second, or Hertz. Some of these would be audible tones if played from a signal generator equipped with a speaker, while others would be above or below the range of typical human hearing. Frequencies listed should be treated as electronic reagents, which is to say that they can be used concurrently during balancing broadcasts to increase impact or effectiveness.

Remember that all information captured in the "Energetic Processes" field was developed/discovered by an individual working on a specific set of challenges at a particular time. *Always test to verify* that the information presented is relevant and appropriate for the research you are doing at this time.

**Note on using reagents:** Whether the reagent is an electronic frequency (added through the "SIGNAL IN" port) or a sample of a color, essential oil, or supplement (placed in the input well), every reagent must be tested to ensure that the desired impact is being achieved. The primary question for the researcher should be,

***Does this reagent increase or decrease the energetic resonance of my research subject?"***

Does adding the reagent or the frequency make the General Vitality or part of the organism go up or down? If it is a pathological pattern of information, does the reagent/frequency make it weaker or stronger? Testing the applicability of a reagent only requires taking a new reading on the intensity dial to verify that the desired outcome will be achieved.

Chemical Element, Nickel, Antidote-Thallium 78.7-100, Color -Turquoise	16.80	100.00	excessive or deficient check iron. Freq: 8.94, 190.22, 205.06
Chemical Element, Niobium, Antidote-Uranium 98.6-100, Color -Turquoise	28.40	100.00	
Chemical Element, Nitrogen, N, A# 7, AWt 14.0067, Antidote-Fluorine 62.5-100, Color -Green	80.60	100.00	Heart Chakra, check in sheep, excessive or deficient check zinc, boron, potassium; Freq: 153.8, 165.8, 10.1, 215.7, 232.5
Chemical Element, Nitrogen, N, A# 7, AWt 14.0067, Antidote-Fluorine 62.5-100, Color -Green	12.00	10.00	Heart Chakra, check in sheep, excessive or deficient check zinc, boron, potassium. 153.78, 165.78, 10.13, 215.7, 232.53
Chemical Element, Nobelium, No, A# 102, AWt (255.0933)	87.60	100.00	
Chemical Element, Osmium, Antidote-Lead 77.6-100, Color -Yellow	70.40	100.00	Solar Plexus Chakra
Chemical Element, Oxygen, O, A# 8, A Wt 15.9994, Color -Blue	15.70	100.00	Throat Chakra, always check; Freq: 13.56, 288.59, 311.1
Chemical Element, Oxygen, O, A# 8, A Wt 15.9994, Color -Blue (*)	31.50	13.50	Throat Chakra, always check
Chemical Element, Palladium, Pd, Antidote-Bismuth 70.3-100, Color -Yellow	61.60	100.00	Solar Plexus Chakra, a rare, silvery-white, ductile, malleable, metallic element of the platinum group, used as a catalyst, may increase tumor growths
Chemical Element, Phosphorus, P, A#15, AWt 30.97376, Color: Lemon	94.60	100.00	note B#, non-metallic, antidote-Tin 94.7-100, normally white, phosphorescent, waxy solid, turns yellow when exposed to light; poisonous, combines easily with oxygen & can ignite; Freq: 480.0, 40.48, 861.72, 928.95
Chemical Element, Platinum, Pt, Antidote-Iodine 86.1-100, Color -Yellow	82.20	100.00	Solar Plexus Chakra, steel-gray, malleable, ductile metallic element, highly resistant to corrosion electrochemical attack; Freq: 21.50, 457.65, 493.36
Chemical Element, Plutonium, Pu, A#94, AWt (244.0642)	97.80	100.00	chemical element obtained from neptunium which in turn is obtained from uranium
Chemical Element, Polonium, Po, A#84, AWt (208.9824) Antidote-Germanium 57.2-100, Color -Indigo	86.70	100.00	Brow Chakra, a radioactive element formed by the neutron irradiation of bismuth followed by beta decay, aids electric discharges; smokers should check levels

Chemical Element, Potassium, K, Color: Magenta	08.90	100.00	note D#, antidote: Cerium 42.8-100, a soft, silver white, wax like metallic element that oxidizes rapidly when exposed to air, when excessive or deficient check iron, sodium, manganese, zinc, boron, calcium; Freq: 304.0, 4.67. 99.35, 107.1
Chemical Element, Praseodymium, Pr, Color -Lemon	57.70	100.00	a silvery, malleable, metallic chemical element of the rare earth group, salts are green
Chemical Element, Promethium, Pm, A# 61, AWt (144.9128)	48.40	100.00	obtained from fission of uranium or neutron bombardment of neodymium
Chemical Element, Protactinium, Pa, Color -Lemon	84.10	100.00	a rare, radioactive, metallic chemical element occurring in pitchblende
Chemical Element, Radium, Ra, A#88, AWt (266.0254) Antidote-Mercury 84.6-100, Color-Green	83.00	43.00	Heart Chakra, radioactive and fluorescent, metallic element found in very small quantities in pitchblende
Chemical Element, Radium, Ra, A#88, AWt (266.0254) Antidote-Mercury 84.6-100, Color-Green	98.10	100.00	Heart Chakra, radioactive and fluorescent, metallic element found in very small quantities in pitchblende
Chemical Element, Radon, Antidote-Strontium 67.7-100, Color -Violet	93.80	100.00	Crown Chakra
Chemical Element, Rhenium, Color -Yellow	55.70	100.00	Solar Plexus Chakra
Chemical Element, Rhodium, Antidote-Ytterbium 57.4-100, Color -Yellow	81.00	100.00	Solar Plexus Chakra; Freq: 3.17, 67.52, 72.29
Chemical Element, Rubidium, Color -Magenta	43.40	100.00	enhances release of norepinephrine, mobilizes lithium, high affinity for pancreas, spleen & liver, may affect sleep rhythms, found in Brazil nuts, spinach, parsley, rhubarb, beets; Freq: 9.65, 205.53, 221.56, 32.72, 696.53, 750.88
Chemical Element, Ruthenium, Color -Yellow	19.40	100.00	Solar Plexus Chakra
Chemical Element, Samarium, Antidote-Molybdenum 86.9-100, Color -Lemon	53.10	100.00	
Chemical Element, Scandium, Color -Lemon	92.60	100.00	may increase tumor growths; Freq: 24.29, 517.06, 557.40
Chemical Element, Seaborgium	36.75	31.00	
Chemical Element, Selenium, Antidote-Gold 63.3-100, Color -Orange	72.00	100.00	note C#, Sacral Chakra. Freq: 272.0, 19.09, 406.41, 438.12
Chemical Element, Silicon, Si, A# 14, AWt 28.086, Antidote-Carbon 83.9-100, Color -Orange	04.80	100.00	Sacral Chakra, causes poor memory recall, psychological problems, central nervous system damage; a deposit of this mineral could cause arthritic problems; Freq: 19.86, 422.87, 455.86
Chemical Element, Silicon, Si, A# 14, AWt 28.086, Antidote-Carbon 83.9-100, Color -Orange	18.25	100.00	Sacral Chakra, causes poor memory recall, psychological problems, central nervous system damage, deposit of this mineral could cause arthritic problems
Chemical Element, Silicon, Si, A# 14, AWt 28.086, Antidote-Carbon 83.9-100, Color -Orange	90.00	57.00	Sacral Chakra, causes poor memory recall, psychological problems, central nervous system damage, deposit of this mineral could cause arthritic problems
Chemical Element, Silver, Antidote-Tellurium 20.7-100, Color -Lemon	92.70	100.00	Freq: 4.05, 86.13, 92.85, 4.65, 99.03, 106.75

Chemical, Petro, Ethyl Alcohol, Colorless, Volatile, Flammable Liquid, Denatured Alcohol	40.50	27.50	causes neurasthenic syndrome, central nervous system depression, vodka 95% ethyl alcohol, used as solvent, cleaning solutions, explosives, also called ethanol, grain alcohol
Chemical, Petro, Ethylbenzene, Water Contaminant	39.50	36.50	
Chemical, Petro, Ethylene, TC	46.50	81.75	found in soft drinks
Chemical, Petro, Everclear Alcohol	28.50	31.50	
Chemical, Petro, Freon (Dichloro, Difluoro Methane), Propane, Water Contaminant	35.50	23.50	
Chemical, Petro, Freon, R22	18.25	57.50	
Chemical, Petro, I,I,I-Trichloroethane, Water Contaminant	37.00	29.25	causes loss of facial sensation, impaired memory and concentration, tremors
Chemical, Petro, Isopropyl Alcohol	65.50	32.25	found in dish soap
Chemical, Petro, Isopropyl Alcohol	60.90	53.25	found in dish soap
Chemical, Petro, Isopropyl Alcohol, Clear, Colorless, Flammable, Mobil Liquid	45.50	44.50	causes neurasthenic syndrome, central nervous system depression, used in antifreeze compounds, lotions, cosmetics, solvent for gums, shellac, essential oils, all cold cereals
Chemical, Petro, Kerosene, Often Found in Water, From Petroleum or Shale Oil	10.25	83.75	also lamp oil, coal oil, lanterns, fuel for heating and cooking
Chemical, Petro, Mek (Methyl Ethyl Ketone)	29.50	34.50	
Chemical, Petro, Mek (Methyl Ethyl Ketone)	35.90	48.90

Fungus & Parasitic Diseases, Flukes, Blood, Protozoal, Schistosomiasis	28.00	95.00	species: schistosome haematobium, S. mansoni, S Japonicum; infests mesenteric and pelvic veins, can cause S dermatitis-swimmers itch; use diatomaceous earth (DE), pumpkin seeds, clove; Freq: 787.0
Fungus & Parasitic Diseases, Flukes, Blood, Protozoal, Schistosomiasis	35.00	27.50	
Fungus & Parasitic Diseases, Flukes, Chinese Liver, Worms	23.75	02.25	causes abdominal discomfort, and after years cirrhosis, infestation develops from eating raw fish contain worm cysts; use diatomaceous earth (De), pumpkin seeds, clove; 787.0, 60.0, 125.0
Fungus & Parasitic Diseases, Flukes, Heart	28.00	25.00	infests all areas of the heart; use diatomaceous earth (DE), pumpkin seeds, clove; Freq: 787.0
Fungus & Parasitic Diseases, Flukes, Intestinal, Protozoal	24.00	54.00	species - gastrodiscoides hominis, fasciolopsis buski, heterophyes, metagonimus yokogawai; use diatomaceous earth (DE), pumpkin seeds, clove; Freq: 787.0
Fungus & Parasitic Diseases, Flukes, Liver, Hepatic, Protozoal	53.00	07.00	species - clonorchis sinensis, fasciola hepatica, microcoelium dendriticum, opisthrochis felineus; infests liver & bile ducts; use diatomaceous earth (DE), pumpkin seeds, clove; Freq: 787.0
Fungus & Parasitic Diseases, Flukes, Liver, Sheep	64.25	64.25	see page 33 cure for all diseases; use diatomaceous earth (DE), pumpkin seeds, clove; Freq: 787.0
Fungus & Parasitic Diseases, Flukes, Lungs, Pulmonary, Protozoal	64.00	45.00	species - paragonimus westermani, infests lung tissues; use diatomaceous earth (DE), pumpkin seeds, clove; Freq: 787.0
Fungus & Parasitic Diseases, Flukes, Lymph, Protozoal	48.50	66.50	infests all areas of the lymphatic system; use diatomaceous earth (DE), pumpkin seeds, clove; Freq: 787.0
Fungus & Parasitic Diseases, Flukes, Pancreatic, Cattle	72.50	47.50	see page 33 cure for all diseases; use diatomaceous earth (DE), pumpkin seeds, clove; Freq: 787.0
Fungus & Parasitic Diseases, Flukes, Parasitic Worms	59.00	55.00	stages - adult, egg, miracidium, sporocyst, redia, cercaria, and metacercaria; use diatomaceous earth (DE), pumpkin seeds, clove; Freq: 787.0, 60.0, 125.0
Fungus & Parasitic Diseases, Flukes, Parasitic Worms, Trematodes	35.00	45.50	
Fungus & Parasitic Diseases, Fungus Systemic Diseases	80.00	79.00	check spleen 4.00-95.00, use 4.00-3.50 (read high) to build resistance to all fungi
Fungus & Parasitic Diseases, Fungus Systemic, Aspergillosis	80.00	84.00	infection caused by a fungus characterized by small inflamed lesions of the skin, respiratory tract, bones, etc.; Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Blastomyces Brasiliensis	44.00	58.75	check copper, boron, and hydrogen peroxide for antidote; Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Blastomyces Dermatiditis	25.00	70.25	check copper, boron, and hydrogen peroxide for antidote; Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Blastomycosis	80.00	40.00	from spores in decaying wood and soil, symptoms same as pneumonia, responds to antifungal drugs not antibiotics
Fungus & Parasitic Diseases, Fungus Systemic, Chromomycosis	80.00	72.00	Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Coccidioidesimmitis, Coccidioides, Valley	05.00	44.50	Freq: 787.0

Patterns of Information	Rate		Energetic Processes

Fungus & Parasitic Diseases, Fungus Systemic, Fungus, General	03.00	98.00	Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Geotrichosis	80.00	68.00	Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Histoplasma Capsulatum	18.50	51.00	check copper, boron, and hydrogen peroxide for antidote; Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Histoplasma Farcimosum	13.50	14.25	check copper, boron, and hydrogen peroxide for antidote; Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Histoplasma Mix	72.50	42.00	check copper, boron, and hydrogen peroxide for antidote; Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Histoplasmosis, Histoplasma	80.00	50.00	a pulmonary infection often self-limiting; a progressive disease involves ulceration of liver, spleen and lymph nodes, usually fatal, spores are carried by air from the soil; Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Maduromycosis	80.00	74.00	Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Nocardiosis	80.00	82.00	Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Paracoccidioidomycosis	80.00	53.00	Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Penicilliosis	80.00	80.00	Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Phycomycosis	80.00	73.00	Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Rhinosporidiosis	80.00	48.10	Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Sporotrichosis	80.00	87.00	Freq: 787.0
Fungus & Parasitic Diseases, Fungus Systemic, Systemic Candidiasis, Candida	80.00	58.00	Freq: 787.0
Fungus & Parasitic Diseases, Granulomas, Sack-Like Capsule Formed From Scar Tissue	35.50	51.00	from parasitic infection of blood vessels between liver and intestines, (see Schistosomiasis); Freq: 787.0

Fungus & Parasitic Diseases, Hypothalamic CRH Hormone, Found in Chronic Fatigue Syndrome	22.50	32.00	responsible for cortisol levels, often found in roundworm sufferers, check vasoactive intestinal polypeptide parasitic secretions; Freq: 787.0
Fungus & Parasitic Diseases, Orthostatic Intolerance, Found In Chronic Fatigue Syndrome	26.00	27.00	check vasoactive intestinal polypeptide parasitic secretions; Freq: 787.0
Fungus & Parasitic Diseases, Parasite Hormone Secretion, Hippocampal Cholinergic	36.25 51.00	26.00 26.00	neurostimulatory peptide (HCNP); Freq: 787.0
Fungus & Parasitic Diseases, Parasite Hormone Secretion, Vasoactive Intestinal Polypeptide	29.00	23.75	(VIP), involved in regulating blood pressure and blood flow particularly to the brain; Freq: 787.0
Fungus & Parasitic Diseases, Parasites, Strongyloides Stercoralis	30.00	29.00	from Southeast Asia; Freq: 787.0
Fungus & Parasitic Diseases, Parasitosis	25.00	34.50	check eosinophil and serum IgE (immunoglobulin E) for elevated levels if high usually means parasitic infection; Freq: 787.0
Fungus & Parasitic Diseases, Protozoal	59.00	32.00	Freq: 432.0, 753.0, 787.0
Fungus & Parasitic Diseases, Protozoal, African Sleeping Sickness, Trypanosoma Species	47.25	33.50	causes lethargy which progresses to coma and death; carried by tse tse fly
Fungus & Parasitic Diseases, Protozoal, Amebiasis, Amoebae In	23.00	00.00	found in colon, balance acid/alkalinity
Fungus & Parasitic Diseases, Protozoal, Amebiasis, Amoebae In	23.00	85.20	found in colon, balance acid/alkalinity
Fungus & Parasitic Diseases, Protozoal, Amebiasis, Amoebae In	23.00	96.00	found in colon, balance acid/alkalinity
Fungus & Parasitic Diseases, Protozoal, Amebiasis, Amoebae In	23.00	100.00	found in colon, balance acid/alkalinity
Fungus & Parasitic Diseases, Protozoal, Amebic Meningoencephalitis, Naegleria Species	58.00	56.75	causes inflammation of the meninges and brain, almost always fatal, acquired when swimmers sniff water up the nose
Fungus & Parasitic Diseases, Protozoal, Balantidiasis, Balantidium Coli	20.25	01.00	causes abdominal discomfort and diarrhea, spread by eating pigs and other animal through fecal contamination
Fungus & Parasitic Diseases, Protozoal, Entamoeba Histoplytica	70.00 36.25	44.00 49.75	causes ulcerative lesions in the colon, bloody diarrhea, amebic dysentery, abscesses may form in brain, liver or lungs, spread by fecal matter
Fungus & Parasitic Diseases, Protozoal, Fever, Temperature Chill Associated With Malaria	95.00	85.00	use of 3.00-8.00 appendix is effective; Freq: 43.2, 20.0, 880.0, 2200.0
Fungus & Parasitic Diseases, Protozoal, Giardiasis, Giardia Lamblia, Waterborne Disease	14.00	12.00	flagellate protozoan parasite found in intestine, causes diarrhea, spread by fecal matter in water or food prepared by people with mild cases
Fungus & Parasitic Diseases, Protozoal, Giardiasis, Giardia Lamblia, Waterborne Disease	95.00	89.00	flagellate protozoan parasite found in intestine, causes diarrhea, spread by fecal matter in water or food prepared by people with mild cases
Fungus & Parasitic Diseases, Protozoal, Giardiasis, Giardia Lamblia, Waterborne Disease	56.25	25.75	Flagellate protozoan parasite found in intestine, causes diarrhea, spread by fecal matter in water or food prepared by people with mild cases
Fungus & Parasitic Diseases, Protozoal, Giardiasis, Giardia Lamblia, Waterborne Disease	42.00	15.80	Flagellate protozoan parasite found in intestine, causes diarrhea, spread by fecal matter in water or food prepared by people with mild cases

Patterns of Information	Rate		Energetic Processes
	Left	Right	
Meridian, Circulation, Pericardium	88.00	45.00	dissipates excess energy away from heart from abnormal states of illness, emotional disturbance, exercise, or injury
Meridian, Endocrine, Triple Warmer, Triple Burner	30.50	63.50	use with 12.00-60.00 spleen, 6.50-51.50 lung, 11.25-38.00 bladder and secondary 67.75-23.25 large intestine, 38.50-88.50 small intestine
Meridian, Endocrine, Triple Warmer, Triple Burner	99.50	43.00	coordinates all the functions of water metabolism, upper region spreads the blood, middle region churns up the food, lower region excretes impurities
Meridian, Gall Bladder	62.50	37.50	excretes bile products from the liver, heart and gallbladder responsible for decision-making
Meridian, Gall Bladder	75.50	32.75	use with 52.00-62.25 heart, 24.50-58.75 kidney, 67.75-23.25 large intestine and secondary 11.00-83.00 stomach, 11.25-38.00 bladder
Meridian, Governing Vessel	29.50	71.00	use with 13.25-33.25
Meridian, Heart Constrictor, Central, Protector,	13.25	33.25	use with 29.50-71.00 check RNA 10.50-11.00
Meridian, Heart Protector or Triple Warmer	41.70	57.10	
Meridian, Heart, Upper Burner, check Spleen & Liver, Depends on Kidney	52.00	62.25	use with 75.50-32.75 gallbladder, 24.50-58.75 kidney, 67.75-23.25 large intestine and 59.75-69.75 circulation/sex, 6.50-51.50 lung
Meridian, Heart, Upper Burner, check Spleen & Liver, Depends on Kidney	84.50	65.00	moves blood through vessels, stores the spirit, reacts to emotional disturbances, particularly during summer
Meridian, Kidney, Lower Burner, check Heart, depends on Heart, Basis for Energy	24.50	58.75	use with 67.75-32.75 large intestine, 75.50-32.75 gall bladder, 52.00-62.25 heart and secondary 57.00-65.50 liver, 12.00-60.00 spleen
Meridian, Kidney, Lower Burner, check Heart, depends on Heart, Basis for Energy	79.75	65.50	responsible for growth, development and reproductive functions, primary role in water metabolism, stores one's inherent essence, must be kept strong
Meridian, Large Intestine	52.00	29.00	metabolism of water, extracting water from waste materials, check spleen and stomach disorders
Meridian, Large Intestine	67.75	32.75	use with 24.50-58.75
Meridian, Liver, Middle Burner, check Spleen & Heart, Spreads Energy	57.00	65.50	use with 38.50-88.50 small intestine, 11.00-83.00 stomach, 59.75-69.75 circulation/sex & secondary 12.00-60.00 spleen, 24.50-58.75 kidney
Meridian, Liver, Middle Burner, check Spleen & Heart, Spreads Energy	60.50	40.00	responsible for spreading and regulating energy throughout body, stores blood when body at rest, critical for menstrual cycle and sexuality, check for depression, frustration, bad temper
Meridian, Lung, Upper Burner, Governs Energy	06.50	51.50	use with 11.25-38.00 bladder, 12.00-60.00 spleen, 30.50-63.50 triple warmer & secondary 52.00-62.25 heart, 59.75-69.75 circulation/sex
Meridian, Lung, Upper Burner, Govern's Energy	68.75	42.25	first to sense weather change, sensitive to emotional changes, controls liquid metabolism, which distributes liquid to the skin
Meridian, Small Intestine	38.50	88.50	
Meridian, Small Intestine	50.00	69.25	separates waste material from nutritious elements in food, which is distributed throughout the body, waste is sent to large intestine

## BASIC RADIONICS – Core Principles of KRT Radionics

**“Luminous beings are we - not this crude matter.”**  
*Yoda, speaking while pinching Luke Skywalker.<sup>1</sup>*

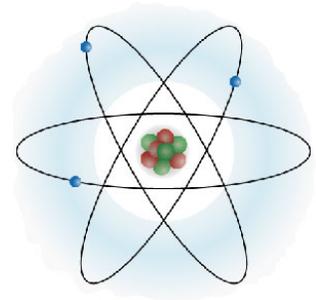

### 1. Everything is vibration and energy.

High-school physics textbooks explain that everything in our universe is comprised of tiny particles called atoms - the smallest particles of a chemical element that can exist and still take the form of that element. Atoms are themselves comprised of even tinier particles - protons, neutrons, electrons, quarks, gluons and many others orbiting one another with such speed that they appear as solids even though they are mostly comprised of empty space. These subatomic particles are the building blocks of atoms. The number and arrangement of subatomic particles in atoms determine whether an atom takes one form or another in our physical realm. The difference between lead and gold is only three electrons, three protons and a handful of neutrons!

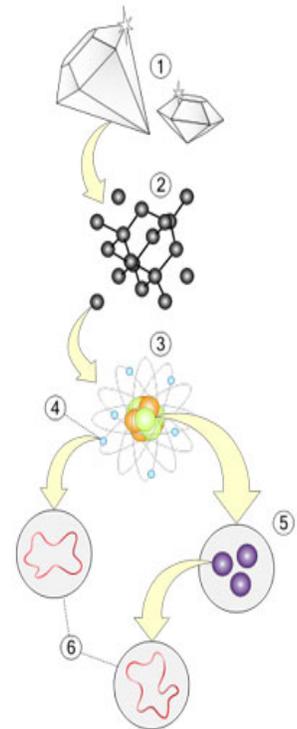

Recent advancements in mainstream physics have revealed that many subatomic particles are not the discreet, stable objects we've always imagined. In fact, many more subatomic particles have been discovered that are continuously and spontaneously *appearing and disappearing* inside the atomic structure at speeds greater than can be observed. Scientists only became aware of these “virtual” particles as a result of their frequent and measurable influence on larger, observable subatomic particles.

For decades, Col. Tom Bearden has described the limitless energy and constant motion of these subatomic particles as the “virtual particle flux”, a boundless sea of potential energy whose native randomness may be externally ordered by frequency information defined by the focused intent of the trained operator and broadcast by the radionic instrument.

In recent years, mainstream scientists have presented new evidence that substantiates the core feasibility of Col. Bearden's assertions; “String Theory” describes many subatomic particles not as particles at all, but instead as linear structures that stretch like guitar strings through not only our universe, but also through the other dimensions that are believed to exist outside the bounds of what we perceive as physical reality. This definition reveals the mysterious “virtual” particles to actually be strings that flash in and out of existence through our universe at their rates of vibration – their frequencies. In fact, String Theory specifically confirms the direct and inseparable relationship between vibratory energy and the physical manifestation of matter:

Classic model of the atom.

#### Levels of Magnification<sup>2</sup>

1. Macroscopic level – *Matter*
2. Molecular level
3. Atomic level – *Protons, neutrons, and electrons*
4. Subatomic level – *Electron*
5. Subatomic level – *Quarks*
6. String level

*Long, light strings can vibrate at different resonant frequencies, each such frequency describing a different elementary particle. So in string limits, any elementary particle should be thought of as a tiny vibrating line, rather than as a point. The string can vibrate in different modes just as a guitar string can produce different notes, and every mode appears as a different particle: electron, photon, gluon, etc.<sup>3</sup>*

Vibration mode also controls the basic characteristics of what appear to us as individual unconnected particles, including mass, electrical charge and spin.

Because the subatomic particles that make up *every* atom in our universe are defined by the vibratory properties of the energized “strings” that bind them across the multidimensional spacetime, now mainstream science stands in agreement with what has always been a philosophical pillar within both the spiritual and esoteric arts – the idea that everything that exists in the physical realm is made up of vibration and energy.

## **2. Vibratory frequency information defines the physical realm.**

The vibration modes of tiny subatomic particles found in every atom determine the observable form that will be taken by those particles within our physical realm. In this way, a vibration mode is like a musical note that sings out to describe a tiny piece of the universe. And just as musical notes can be combined to create chords and melodies, the vibration modes of individual atomic particles combine to sing out entire symphonies of information that define the specific physical characteristics that complex objects and organisms will exhibit within the physical realm. As such, every element or compound is defined by a unique blueprint of vibratory energy. This point is of pivotal importance to the study of radionics, as those vibratory blueprints are the signature frequencies to which the radionic instrument may be set – the radionic rates.

Just as radio stations are identified by AM and FM band radio frequencies, radionic rates are the signature known patterns of information-as-energy. And just like tuning a radio to a particular sports station can reveal information about the latest baseball scores, the radionic analyzer can be tuned to a specific signature frequency in order to receive information about the relative energetic strength of that particular aspect of the specimen.

Understanding the mechanical operation of the analog analyzer provides deeper insights into the nature of the radionic rates. Each rate knob on the instrument panel is connected to a parallel plate tuning capacitor. It is well known that musical tuning forks react spontaneously when exposed to identical frequencies. In the same way, the parallel plate tuning capacitors in analog (non-digital) radionic instruments serve as adjustable, high resolution tuning forks that physically resonate when tuned to the frequencies that define the appearances of the particles that make up our physical world.

Also like the musical tuning forks, analog radionic instruments require no electrical power whatsoever to achieve a state of resonance detectable by the trained operator; the energy is inherent in the vibration mode found in each atom. This natural state of resonance makes these components ideal not only for setting known rates, but also for detecting and documenting new patterns of resonance discovered through an open scan. Meanwhile, because these components are capacitors – devices that build and hold a charge – faint energetic signals are automatically amplified for easier detection by the radionic researcher.

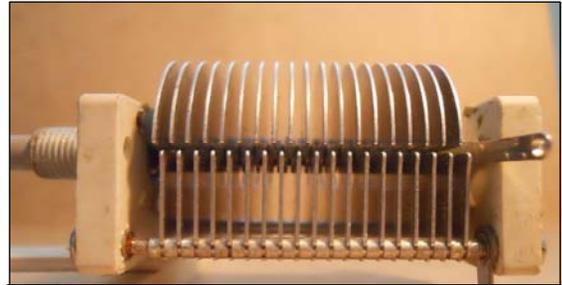

However, radionic rates are not absolute frequencies like those used by a broadcast radio station, where the settings are stated in cycles per second (hertz). For example, setting your radio to "750" on the AM dial actually means the tuner has been set to 750,000 hertz.

In contrast radionic rates are defined as a percentage of the bandwidth accessible across the range of operation of the variable plate capacitors. Turning the knob adjusts the degree of interweaving of the tuning plates from not at all interwoven ("0" on the rate dial – top photo) to completely interwoven ("100" on the rate dial – bottom photo). This is why radionic rates start at zero and end at 100; the numbers reflect the percentage of the total accessible range, not a specific set frequency.

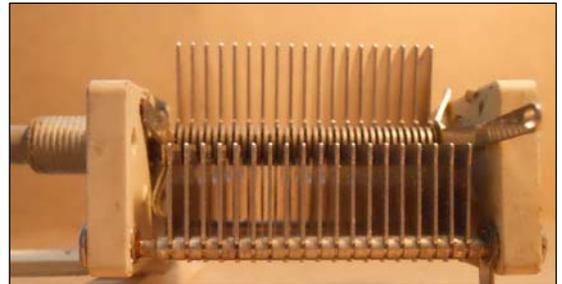

Understanding the mechanical operation of the tuning capacitors is also key to understanding the relationship between the "positive" rates described for the traditional 180 degree rate dials and the "negative" rates that may be set on instruments equipped with 360 degree dials.

In the fourth photo we see a variable capacitor that has been set to 66.00, meaning that the parallel plates are 66% interwoven together. By continuing to rotate the knob clockwise toward 100.00, then continuing into the "negative" range, the plates begin to be less interwoven, moving toward being only 66% interwoven, but this time on the opposite side of the capacitor. This is illustrated in the fifth photo.

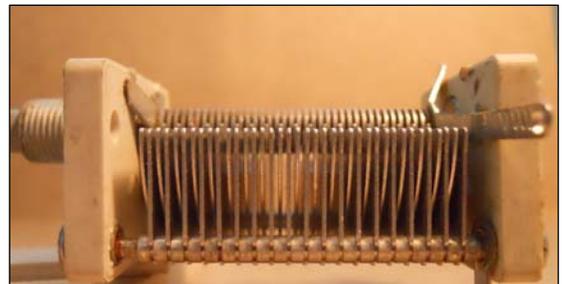

The most important thing to realize is that despite the use of the term "negative" to describe the rates found on the lower half of the 360 degree dial, this word should not be misunderstood to suggest there is anything bad, unwholesome or evil about this lower range. Within the context of the rate dials, the term "negative" merely describes the other half of the scalar waveform that is being generated by the radionic instrument. It is for this reason that we at KRT prefer the terms "upper" and "lower" to describe these rates, as this reduces the possibility of confusion.

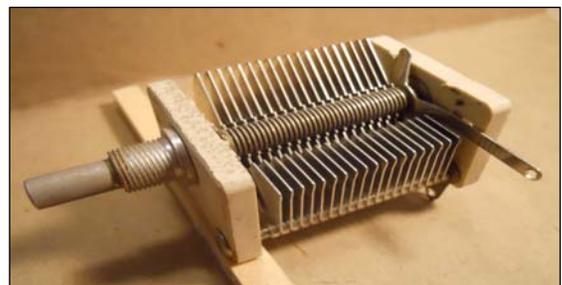

0% engaged = "0" on the rate dial

50% engaged = "50" on the rate dial

100% engaged = "100" on the rate dial

66% engaged = "66" on the rate dial

66% engaged = "-66" on the rate dial

### **3. Vibratory energy emanates through the physical realm.**

The ceaseless vibratory energy found in every atom shines through us and the world around us, producing a field of “subtle” energy - emanations that may be observed directly by some individuals and detected by radionic instruments through an input device like a helical coil sample well. The energy fields radiating from living organisms have been recognized by almost every culture in human history, depicted as halos or coronas of light surrounding the holy, described as the aura by eastern philosophers and even photographed using the techniques discovered by Semyon Kirlian in 1939.

While vibratory patterns of information uniquely define each of us from one another and everything else in the physical realm, we believe the energy that drives those vibrations comes from the same source. And if everything within the physical realm is powered by the same energy source, everything in this realm is also bound to everything else through this energy. This is an essential factor in the success of radionics in two areas:

A. Unbound by physical limits: With an analog radionic instrument, the operator has the ability to analyze the energetic state of a plant on a farm that is on the other side of the planet, then broadcast new patterns of information-as-energy back to that plant – all without electrical power. This would be impossible if the radionic researcher were broadcasting a signal through the physical realm, where the range of the powered antenna falls off at an exponential rate with increasing distance. But because the radionic instrument is broadcasting back to the energetic realm that binds us, the information is received immediately wherever that plant may be located.

B. Effectiveness of Samples/Witnesses: Mainstream science acknowledges that a sample retains the same information as the organism or element from which that sample was taken. This is why a soil scientist may conduct a chemical analysis using a sample of soil from a field rather than requiring a review of *all* of the soil in the field. The radionic researcher knows that the sample and original are defined by the exact same unique blueprint of vibratory information.

Equally effective for analysis is a “witness” that captures the vibratory signature of the organism or element to be studied, such as those photographs that have not been divided into negative and print phases during processing - digital photos, slides and silver emulsion “instant” photos of the kind made popular by Polaroid. Like a sample, the witness exists because of the energy provided from the same central source as drives the original. This allows the use of samples and witnesses for analysis, but also for broadcasting vibratory information back through the energetic realm to the original.

### **4. Vibratory information can be broadcast back to the virtual particle flux.**

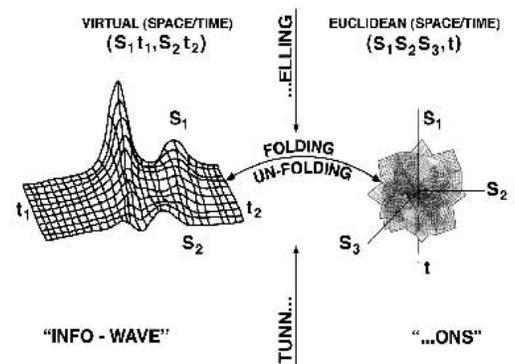

The human mind is innately equipped with the ability to pre-engineer a future reality through delivery of vibratory information back to the energetic realm through the process of focused intent. There are many example of the unlimited power of focused intent that may be found beyond the esoteric world of radionics. Anyone who has seen the power of prayer or the impact of positive thinking has seen focused intent in action, applied through the same mechanism that the ancient Kabbalah describes as the process for manifestation of our physical reality from “limitless divine energy”. Colonel Bearden once described this process by noting that thinking about a physical object creates a real object that exists in three *other* dimensions beyond those associated with our physical realm, but

shares the common dimension of time. As long as the thought is maintained, an external potential (pattern) is provided to the otherwise-random virtual particle flux.

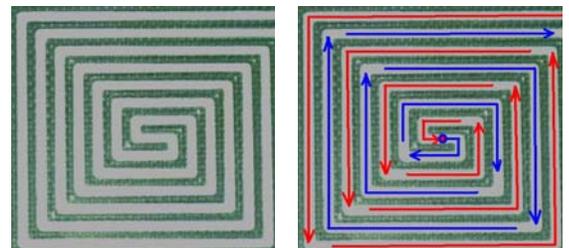

However, most people do not have the time, training or mental intensity needed to maintain continuous focus of intent necessary to bring about the changes desired. Here the radionic instrument provides one of its most important features, allowing the operator to focus on scanning for a rate for a relatively short period of time, turn on the amplifier, and walk away. In this way, the radionic instrument serves as an automated repeating station for the focused intent of the operator.

Beginning with the prolific inventor Nikola Tesla nearly 100 years ago, many theories have been published that mathematically predict the transverse or "scalar" movement of signal information across space and time without obeying the normal requirements for broadcast energy versus output. An example of this is shown in the diagram at the right. But how is it possible to "fold and unfold" space/time? The answer is found in the dual-spin coil antenna.

The photograph shows an example of the KRT dual-spin coil antenna developed by KRT founder Peter J. Kelly. While at first glance the photos seem to show a single spiral, in fact there are two spirals that are perfectly interwoven with one another. In the second photo the red and blue arrows clarify that the frequency information actually winds all the way to the center, reverses direction, then winds all the way back to the outside of the spiral. In this way, the same frequency information is simultaneously spun in both the clockwise and counterclockwise – instead of "folding and unfolding" as indicated in the diagram, the frequency information is contracting (red movement) and expanding (blue movement) at the same time in the same space. The result is the longitudinal "scalar" wave that provides the pathway back to the energetic realm from which all things flow.

Graphic representation of scalar transfer of vibratory information-as-energy.<sup>4</sup>

Not one spiral, but two! Follow red arrows to the center and return via blue to see signal spun inward and outward concurrently, as found on the KRT dual-spin coil antenna.

## 5. The radionic instrument builds the energetic abilities of the operator.

At the very heart of radionics is the focused intent of the trained operator. It is **the mind of the operator that serves as the focusing lens for the limitless symphony of vibration energy that defines and illuminates our physical reality.** The radionic instrument merely serves as a mind-matter interface, allowing the operator to recognize points of harmonic resonance through the positive feedback provided by the reaction/plate antenna when the operator has achieved a state of focus while dowsing, scanning for radionic rates, and utilizing the intensity dial. The process of using a radionic instrument trains the operator to move smoothly and easily in and out of a state of pure

crystalline focus. In addition to building confidence, accuracy and speed with the instrument, the operator becomes skilled at accessing the energetic realm from which we flow.

### **In Conclusion**

The universe is a symphony of living energy that sings out to a cosmos far greater than the physical realm we perceive as reality. The radionic instrument allows quantified analysis and balancing of the subtle energy fields emitted by everyone and everything in that realm. Because the information is communicated through to the energetic universe that binds us, radionic analysis, balancing and pre-engineering of future realities takes place beyond conventional limits of space and time. The radionic instrument allows the operator to make informed choices rather than guesses about the world they live in while building the skills and abilities that can maximize personal potential.

## ADVANCED RADIONICS: Scanning Precise Rates

While fundamental components like basic nutrients and chemicals are universal, many complex organic systems are unique due to local variations in species, soil makeup, water conditions, magnetic patterns and the countless other factors that change with geography. For this reason, **one of the most valuable skills that a radionic researcher can develop is the ability to scan their own scalar frequencies**, or "rates", for use in both analyzing and broadcasting with radionic instruments. A rate that has been scanned based on samples or specimens specific to the location of interest can allow the researcher to refine the focus of their intent to address the exact situation and objectives at hand. Many beginning users are intimidated by the idea of scanning their own rates, worrying that they do not have the necessary skills. In fact, there is a systematic process that may be employed that makes rate development nearly as easy as the analysis done while completing a standard worksheet.

### Describing the "Keystone" Rate

The keystone in a masonry arch is the single stone or brick at the center that bears the forces of all the other stones or bricks; remove the keystone and the arch will collapse. Similarly, the majority of the radionic rates that have been published over the years can be considered the keystone rates for each particular organic system or subsystem - those scalar frequencies that are most central to the energetic strength of each particular element. After all, **the energetic composition of an organism as complex as a plant, animal or even a subsystem within is actually a virtual symphony of scalar frequencies**, not just a single simple frequency.

Keystone in an Arch

This is proven by the fact that we utilize entire sheets of rates to assess the overall energetic state of a plant or animal. Yet in each case, the simple radionic rate – the keystone rate - will allow that organism to be most directly strengthened or weakened through energetic balancing by the radionic operator.

### Finding the "Keystone" Rate

In almost all cases, the keystone rate is that frequency which yields the strongest reactions when the specimen or witness in the input well is isolated by the focused intent of the trained operator. However, many beginners are confused by the fact that multiple "sticks" may be detected on the reaction plate in the course of scanning around the rate dial. But **identifying the strongest resonance point is as simple as taking an intensity reading for every reaction detected on the rate dial**. Once the strongest reaction has been identified on a particular dial, the search may continue on the next dial to find the reaction that builds upon the strength of the first dial to reach an even higher level of intensity. This process may be continued on additional banks of the instrument, building "four dial" and even "six dial" rates that most closely and accurately identify the keystone rate for the situation being investigated.

### Refine an Existing Rate

Similarly, known rates may be further refined to reflect the specific situations at hand by applying the rate scanning process to the second (and third, if applicable) bank of the radionic instrument. Simply set the known rate on Bank 1 and utilize the scanning process described to any available banks. The following example illustrates the scanning process.

## Scanning Precise Rates: Example

A Kelly radionic instrument was set up for "Analysis" mode, then the following steps were carried out to develop a two bank (four dial) rate.

1. The instrument was set with Bank 1 turned on and Bank 2 turned off.
2. Bank 1's dials were set with the left hand dial (LHD) to zero, right hand dial (RHD) to "100".
3. The LHD of Bank 1 was slowly rotated toward "100" while seeking a reaction on the "rub" plate.
4. Each time a resonance point was found on the LHD, an intensity reading was taken by turning the "Intensity" dial and seeking a reaction on the "rub" plate. The resonance points and corresponding intensities were recorded.
5. After no additional resonance points were found, the LHD was reset to the rate that had the highest intensity, then the above steps were then repeated on the RHD.
6. Once all resonance points and their intensities were detected on the RHD, the single bank (two dial) rate was designated as that rate with the highest combined LHD and RHD intensities.
7. Bank 1 was set to the rate found in the previous step, then Bank 2 was turned on and set to "0.00-0.00".
8. Resonance points and their corresponding intensities were detected on the LHD of Bank 2.
9. The LHD of Bank 2 was set to the rate with the highest intensity, then the process was repeated on the RHD of Bank 2.
10. The complete two bank (four-dial) rate was that rate with the highest combined strength, as measured on the "Intensity" dial.

**Final Two-Bank Rate**      Bank 1: 60.00-87.50  
    Bank 2: 95.25-66.00

**Note:** It is *essential* that measurements for each dial are built upon the results of the last. This ensures that the final rate reflects the maximum harmony between each rate setting, thus guaranteeing maximum effectiveness. In contrast, if each dial had been scanned independently of each other, the result could be four settings that may or may not have any synergistic relationship with one another. **Remember, the keystone is always found at the TOP of the arch!**

## Statement of Mission

**To distribute top quality technology, resources, and information to the global community of radionic researchers.**

## About Us

Located in Lakemont, Georgia, Kelly Research Technologies was incorporated in 2006 in order to sustain and advance the radionic technology developed by Peter J. Kelly from the early 1970's until his untimely passage in 2004. Core among his contributions was the design of a two-bank radionic instrument that integrated the Hieronymus design for variable plate capacitance signal tuning with the knowledge of solid state amplification he'd acquired while in service to the nation in the U.S. Navy. As a founding member of the U.S. Psychotronics Association in 1974, there were many opportunities for friends and colleagues to try the new instrument. The "Kelly Instrument" would be built for friends, then friends of friends, then in 1978 the first one was sold to a complete stranger – the first of thousands that would choose this sensitive, reliable, and easy-to-operate radionic device.

Today, Kelly Research Technologies manufactures and distributes not only the famous Kelly Personal Instrument, but also a complete line of radionic instruments designed to meet the needs of both the advanced researcher and the busy farmer. In all Kelly instruments, the combination of variable capacitance tuning and solid state amplification allows determination of scalar frequencies and assessment of their intensities through the focused intent of the trained operator, as well as transmission of in-phase and reverse phase scalar frequencies. With thousands of two-dial radionic rates available, Kelly radionic instruments are ideal for all aspects of radionic agriculture, as well as many types of amplified dowsing.

Our 30-day, no-hassle, money-back guarantee ensures that every customer has a pleasant, professional experience. Whatever your reasons, simply return the item to us in like-new condition and receive a full refund of the purchase price. Your only risk is the price of postage. Find out why we've had a great reputation in the radionics community since 1978!
